

Trading

Efficient. Flexible. Visualization.

No matter the size of your business, FESA Trading is always the right tool to project you insight into all aspects of demand and supply picture, for better serve customers while protecting profit. FlexSystem brings decades of experience in order processing system to FESA Trading, to give you the complete control and total visibility over sales, purchase and inventory control operations, to help you deal effectively with the challenges every day.

EFFICIENT

FULLY AUTOMATED ORDER PROCESSING

FESA Trading solution automates and streamlines every facet of order processing. You can set schedule task for system function to ensure tasks are done on time. You'll also trace document activities from top to bottom, to obtain all the changes to demand and supply for compliance reporting.

PRACTICAL STANDARD FLOW

FlexSystem brings decades of experience to every level of your order processing operations, to give you complete control and visibility of single detail of your business. FESA Trading has flexible system design and various standard flows provided to map to different situation, such as Indent Trade, Assembly/Assortment, Consignment Order, Purchase Requisition etc..

TASK SCHEDULING AND AUTO MESSAGE

Task can be scheduled at the server according to user-defined duration, such as by time, by day, by week, or by month. Scheduled result will also automatically distributed by email and built-in Message Center. Pop-up Agent alerts you for any new incoming message. On the other hand, you can review all the messages in the Message Center and trace it right on spot.

APPROVAL WORKFLOW

FESA Trading provides the tool to effectively manage approval workflows that comply with your business and operation requirements. By replacing manual circulation of paper, calls and emails with electronic workflow, you can improve overall speed, efficiency, control and visibility of certain business processes, such as Purchase Requisition, Quotation, Sales Order and Purchase Order etc.

FLEXACCOUNT INTEGRATION

Built by FlexSystem professional team, FESA Trading is fully integrated with FlexAccount, and other subsystems. Data is seamlessly posted to different systems to minimize the chance of manual error during data import and export.

FLEXIBLE

HIGH MOBILITY

Our solution can be easily deployed to any interface, including web browser, mobile device and thin-client technology etc. for high deployment flexibility and scalability to cope with your business needs become more complex. FESA Trading supports multiple client versions, such as Windows Client, Java Client, HTML5 Client and FESA Client, with full functionalities and security control setting.

COMPREHENSIVE SECURITY SETTING

FESA Trading provides easy managed and configured access rights and is compatible with your existing security infrastructures. You can set individual security assignment for each user. More importantly, sensitive information, like cost/price related fields and document type are under detail security control.

INTEGRATION WITH THIRD PARTY SYSTEM

By leveraging FESA Trading, you can use imported data from any non-FlexSystem ERP system as a common information system for deep analysis of your business. On the other hand, FESA Trading data and report can also be exported to other format with ease.

USER AUTHORIZATION

FESA Trading allows you to flexibly manage user access right on which ledger, which function, which report, which transaction type and even which location type, that empowers you with the full control of the user authorization.

VISUALIZATION

-

USER CONFIGURABLE REPORT

Built-in reporting tools, i.e. Report Designer and Pivot Table, empower you to drag and drop any fields in report to view different results from different angles. That means you can design and choose which kind of operation data to be shown at your will. User defined report layout can be saved as template for local or public use.

MULTIPLE DIMENSION SETTING FOR PRODUCT & INVENTORY

You can find detail setting for inventory dimension down to product level, whereas mandatory dimension per product with multiple warehouses. Also, the system fully supports inventory dimension for lot, bin, expiry date, color, size and serial number. Cost method, like Weighted Average, FIFO and LOT can be set for individual product with ease. With such detail setting, you can trace every details by the drill down inquiry from product summary to dimension detail level.

SUPPORT ATTACHMENT

In FESA Trading, you can always find user-friendly tool to help manage your business processes efficiently, such as the file attachment capability. With the attachment function, it is easy and convenient for every end-user to call the attached product image or document file in the Product Master or even every entry.

VERSION HISTORY

The system supports version tracking capability that you can read the history on important master, such as Product, Customer, Supplier and all Sales/Purchase entries and track both amend and delete actions. Moreover, it allows end-user to fill in reasons for follow-up in future.

EXPORT & IMPORT VIA SPREADSHEET

Our innovative technologies add more power to FESA Trading to make it instantly ready to connect with the systems that you use most frequently, so that you can work faster and more smoothly. For example, you can import or export data through Excel for opening, and even overwrite the data for convenience purpose.

IMPRESSICE USER INTERFACE*

A complete new user interface, FESA Client provides you a smooth and improved user experience with built-in dashboard and more configurable options. It consolidates order processing information, reports KPIs into a single panel to give you an intuitive visualization to let you stay on top of inventory control and profitability. Collaboration workspace allows you and your team members to broadcast and share information to foster productivity as well.

*Empowered by FESA Client
